Work Experience

Technical Writer (Freelance Contractor)

2024 – Present

EYGOP (Graphic and Statistical Operations)

- Designs user documentation for EYGOP, a data operations tool.
- Creates engaging use cases based on the audience's user persona.
- Develops a style guide for future documentation, with consistent format for equations, metrics, and data.

Technical Writer II

2022 – 2024

Wizeline

- Reduced onboarding time for new software engineers by 80% with clear process documentation and defining necessary onboarding tools and knowledge.
- Created concept, software architecture, and developer guides that aligned team knowledge on new technology, reducing agile story points by 15%.
- Partnered with UX designers to develop a company-wide intranet that enabled the company to communicate quickly and share documentation through a source of truth channel.
- Collaborated with software developers and other subject matter experts to gather key

information and create technical documentation.

- Designed onboarding processes, software architecture, and developer guides, and write an array of tutorials and manuals for both technical and non-technical audiences.
- Wrote and applied style guides and other documentation standards according to client and audience context.

LanguageLine Solutions

2020 – 2022

Medical Spanish-English Interpreter

- Worked with doctors, nurses, and insurance companies to clearly communicate standards, procedures, and medical information to patients with limited English proficiency (LEP).
- Adapted information and procedures to LEP patients with disabilities to maximize information clarity.
- Managed people with different levels of concerns and stress in challenging situations to communicate information precisely and without knowledge gaps.
